Description of all methods to be used to prevent water runoff and soil erosion from the site to neighboring properties: _____

1. All hazardous, toxic, or obnoxious materials including but not limited to (Lead & Asbestos) be handled, removed, transported, and disposed of per all Local, State, and Federal Regulations.
2. The water supply and the sanitary systems must also be protected or sealed per local, state, and federal regulations. _____ (Village Building Inspector Initials)
3. All other utilities (Gas, Electric, etc.) must be disconnected per supplier's requirements.
 - Release forms from all utilities serving this property must be included with this application.

4. The site of any demolition shall be cleared of debris, rubbish, and pavement; graded and leveled to conform with the adjoining grade of neighboring properties; and seeded, sodded, or treated in some other manner acceptable to the municipality so as to prevent blowing dust, dirt, or sand. Excavations remaining after demolition shall be filled, graded, and covered within thirty (30) days after demolition was commenced.
 - Excavations shall not be filled with any materials subject to deterioration.
5. Removal, transportation, and disposal of all hazardous waste, hazardous and toxic substances, and asbestos shall be conducted in compliance with all applicable State, Federal, and Local statutes, ordinances, and regulations.

This form releases the Inspectors and the Village of Waldo of any liability involved in the razing of this property.
